GWN Community: Emek Hefer

Name of project: Outdoor Seating Area, Beit Yitzhak School

Environmental & Educational Benefits:

- Building facilities from recycled waste reduces the volume of waste that goes to the landfills, but it also means decreasing the amount of dangerous chemicals that seep into the soil and pollute the water and air due to improper waste disposal.
- The students integrated the use of recycled materials and increased their awareness of green building techniques through this process.

Date of Construction: 2006

Team: 6th grade students & FoEME Community Coordinator.

Materials: recycled materials

Description:

- Before the construction of the seating areas, students created small models of various shapes and colors from which the final designs were chosen.
