Expanded list of approved items

Working to promote and improve the Palestinian economy

The Civil Administration works to help strengthen and support the Palestinian economy in Judea and Samaria, with an emphasis on the agricultural and industrial sectors.

In line with this mission, the Civil Administration has expanded the list of items approved for entry into Judea and Samaria.

This important development is expected to promote and improve trade between the West Bank, Israel and markets abroad, and will allow for the creation of numerous Palestinian jobs.

The expansion of the list will be permitted under tight coordination with the security services and according to a system of supervision regarding the entrance and use of permitted items.

**Below: Details on the items approved for supervised entry**

**Group A**- Four dual-use items that are approved, provided that they undergo a separate security evaluation, in addition to regular surveillance and control:

- **Hydrogen peroxide at concentrations above 18%** for the soft drink industry (disinfection of bottles and packaging)

- **Sulfuric acid** for industrial use

- Solid and liquid **urea** for use as agricultural fertilizer
- **Potassium nitrate fertilizer** for agricultural use

**Group B**- Products approved conditional to their examination by the Civil Administration and without need for further security screening:

- **Computer equipment** (computer screens, keyboards, printers and mouses)

- **Lathes, spare parts and additional lathe-related equipment** for the jewelry industry that fit the following criteria: Up to 100 millimeters in size, manually operated, up to 0.35 HP, single phase (230 volts), and lower than 2000 RPMs

- **Naphthalene**

- **Uniforms, emblems and badges** for use by civilians and Palestinian security forces
